# "51" the world's most wanted pen

THE FINE, FINE Parker 51 has been the most wanted pen in the world for many years. It's the pen that's been in the hands of the world's most famous writers, artists, and statesmen. It's the pen that's been in the hands of the world's most famous writers, artists, and statesmen.

In any gathering of distinguished people it is remarkable how often you find Parker 51's the favored writing instrument. Try a 51 and you'll readily understand why it is the world's most wanted pen.

The simple beauty of this pen lends it an refinement. Every detail reflects unobtrusive craftsmanship—working to highest precision standards.

In elegant, modern pen lines no other pen is so well suited to wear or to carry in the pocket. It is smooth, simple, and with precision finish.

The precision fit cap slips on—locks securely without twisting. Within the tapered shell, the 51's patented Klee is safely concealed.

The pen alone is designed for perfection with Superchrome ink, that does it a better job than of course also its delivery ink.

See the 51 today. Colors: Black, Blue, Gold, Silver, Green, Glendale Brown. \$13.00, \$15.00, \$16.00, \$18.00, \$20.00, \$22.00, \$24.00, \$26.00, \$28.00, \$30.00, \$32.00, \$34.00, \$36.00, \$38.00, \$40.00, \$42.00, \$44.00, \$46.00, \$48.00, \$50.00, \$52.00, \$54.00, \$56.00, \$58.00, \$60.00, \$62.00, \$64.00, \$66.00, \$68.00, \$70.00, \$72.00, \$74.00, \$76.00, \$78.00, \$80.00, \$82.00, \$84.00, \$86.00, \$88.00, \$90.00, \$92.00, \$94.00, \$96.00, \$98.00, \$100.00.

## Parker "51"

FOR THE MOST  
MARVELOUS  
NIGHT'S SLEEP  
IMAGINABLE

## GENERAL ELECTRIC Automatic Blanket

This amazing new Automatic Blanket gives you sleeping comfort you've never had before. Its gentle, soothing warmth supplements the natural heat given off by the body and gives you really sound sleep.

At the bedtime temperature drops the bedside control provides greater warmth by keeping the current "On" a greater percentage of the time. If the room temperature rises, less warmth goes into the blanket. Thus, as the temperature varies while you sleep, the bedside control automatically makes your G-E Blanket equal in warmth to one, two or three ordinary blankets.

Available in one, blue, and green; finished with wide extra bound edges. For twin and single beds, size 66" x 86" one control, price \$52.50. Double bed size 72" x 86" with one control, price \$44.50, with two controls for couples who like different degrees of warmth, price \$55.50.

See your nearest G-E Dealer.

## IN THE EDITORS' CONFIDENCE

**J**ALN HALL's solstice adventures were big game hunting (replete with some dramatic close-shots) and can be found on page 19. I've been thinking the strange details of his protest, like the Vancouver random walk (1991 white tie costume "Our Town" first appeared in the Vancouver Mirror Herald. Still, now writes "Our Town" for the Vancouver Sun and Edmonton Bulletin and does a weekly column on the full a hundred pages across the last. His music-making story is one of a series he is writing for *Blackboard* as the proof of a young business being made by a small family.

As a columnist, John Forbes Scott has expressed opinions on almost everything. He even listed 100 separate things which he doubted seriously and followed in the same day with a 300-item list of things in Asia. Scott's acceptance has compared more favorably than the *Star's* list, which not only ended the difference, although have numerous found a necessary to stick Scott, as it has been a single. *Encounter's* Hong Kong July 1 has printed

[illegible]

Waste is collected on the City of Worcester is dramatically demonstrated. Telling last September when he urged his residents to go blueberry picking on Sunday at Great Meadows. By 11 a.m. that Sunday 1,000 cars were jammed together in a bumper on the winding Great Meadows road off the main road and a

of the private lives of men, girls and women, whose habits have been exposed minutely for the benefit of the readers. In such a case as this, it is not only the duty of the writer to be true, but also to be just. It is not only the duty of the writer to be true, but also to be just. It is not only the duty of the writer to be true, but also to be just.

Heads off a growing misapprehension: the trade and publication of the *Secret Inland Field* does not reveal exploitation. Secret has been permeated, with only a minimum of new twisting, by the same trope, as has turned inner life for Melville's readers. The findings themselves will be ignored as they and *Ulysses* appear under the delusive heading "How to Grow Old in a Hurry" (page 50).

Who knows? I may become another Dorothea Diener!<sup>14</sup>

■ Dr. G. Hardy, author of "Cast  
Iron and the Lady Gannoe," on  
page 10, and incidentally, a  
professor of cinema and English  
at the University of Alberta, has  
turned in a report on the historical  
background of the one in which  
the page is set. 1905 to 1918 he  
knew about a fine Gannoe, as  
follows:

large-disk and paper plates were arranged on trays on the paper, all observing to be the paper were used and thrown in group of houses as (not important) as "the house" - nearly empty. They were arranged in a house (not empty), all of them turned and used but not waste than the House (not empty) - (not empty) - nearly empty (not empty) - The chair, also, was not empty, also, was

## Men with a Purpose

In the air age a nation's air power is a strong guarantee for security and peace. The responsibility for maintaining an effective national air power rests on Canada's young men.

The RCAF is now accepting applications from young men of high physical, mental and moral calibre.

You will be trained as either pilot or radio navigator using the most modern scientific equipment available today under personal instruction. On successful completion of your basic flying training, you will receive your commission as a Flying Officer with a total income of \$204 a month.

The Air Force offers great opportunities for the ambitious young men with a taste for adventure.

BUSINESS

## A MILLION DOLLAR BUSINESS REPORTS TO HIM

Trade drives and exhibitions... clerks and shopkeepers... people of wealth and people of small means... every walk of life is represented by Canada's Westons. The variety and variety of their business they represent. Each year thousands of people go there.

Business is back on the track, fast and forthrightly of each Canadian man and woman. For the increased success as capital of Westons is "business success." Whether the success must be large or small, the "business success" is the business to grow and progress, to purchase new equipment and improve production... to provide more jobs, and more opportunities for workers and their advance Canadian welfare and development.

One sign of a healthy business is the increase in number of people who have come down to it. In 1947, the number of shareholders in George Weston Limited was 110. Today there are over 200 shareholders... men and women from every walk of life... from every part of Canada... who are interested in Westons.

## No Jews Need Apply

By PIERRE BERTON

IN THE week or so since 1940, when employment of all kinds were dropped for such a group, employment stopped. Business began to be lost. It was reported by military service as a result of the war, started looking for a job.

It was reported by the University of Toronto, Canada's largest university in Toronto which reported several companies. After an interview by company officials, he was told there were no vacancies.

He placed the personal manager of a small war plant, giving his graduate and 100. The personal man and he was looking for a man. He was told that the company's job was to be a small business. When he was told that the company's job was to be a small business, he was told that the company's job was to be a small business. He didn't even know how to find a job.

I was told a well known business firm. The man he was told he was a well known business firm. The man he was told he was a well known business firm. The man he was told he was a well known business firm.

was a young man for men like him. There was an attempt to be made. By the way, Mr. Epstein, what is your religion? When he was told that the company's job was to be a small business, he was told that the company's job was to be a small business.

Epstein tried a second interview. He was told that the company's job was to be a small business. He was told that the company's job was to be a small business.

The director of Toronto, who represents two of the most important industries (there are more than 170,000 Jews in Canada, 10% of the population) has in the past half dozen years suddenly become a member of the top of the company. A man of letters, plays, music and other interests has been with the public in his own words. He was told that the company's job was to be a small business.

He was told that the company's job was to be a small business. He was told that the company's job was to be a small business. He was told that the company's job was to be a small business.

Given in Canada? Or progress? Hardly. But try looking for a job—in engineering, say—if your name is Greenberg.

There was a letter. How the situation (how, I thought) was. There was a letter. How the situation (how, I thought) was. There was a letter. How the situation (how, I thought) was.

There was a letter. How the situation (how, I thought) was. There was a letter. How the situation (how, I thought) was. There was a letter. How the situation (how, I thought) was.

There was a letter. How the situation (how, I thought) was. There was a letter. How the situation (how, I thought) was. There was a letter. How the situation (how, I thought) was.

# THE TAMING OF NO. 3

By GLENN FRASER

In spectacular air show, Alameda well met Atlantic No. 3, but in rapid old the windstorm of April

PHOTO BY GLENN A. FRASER

For six months men battled the wild black geyser that belched up a  
fumes in air then blazed above the prairie like a atomic blowtorch

**D**ILLARD Bill Murray and his crew of four lost the geyser itself, but not to a gas at Atlantic No. 3 Company in 1911. It was March 8. It was a new well right before the old 20-foot steel structure of Atlantic, now called the first of the well. The well, already in place, the evening shift had drilled 22 feet.

Murray's crew worked four hours, made another 10 feet. Then they heard a muffled whistling and the druck platform shivered. Bombs in for a great volume of gas and liquid mud blew up in their faces.

Murray pulled. Out the lights. The gas was explosive. It was a public enemy. It had to be kept out of the house. The gas was so hot that they could not touch it. The gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

It was a spectacle. All right, one that the old men could not see. The gas was so hot that they could not touch it. The gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

## Blowing Wild

**E**VEN ON that first bluish morning, it was a good long time before the gas and oil could stand higher than the 100 feet of the well. The gas was so hot that they could not touch it. The gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

From the first, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

At daylight the work of tilling the well began. The first gas was out in the hole and it was so hot that they could not touch it.

They pumped in mud for 10 hours before the gas could stand higher than the 100 feet of the well. The gas was so hot that they could not touch it.

It was under 200 feet for the moment. Then on three days later the gas could stand higher than the 100 feet of the well.

In a completed well, you get a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

is left in a hole deep. Then you pump mud down the well and there it is in a mass of mud gas all the way down to the producing zone, which

and you down upon the well to collect in great pools at the very gas below the drilling rig.

The gas must be kept from the well. The gas must be kept from the well. The gas must be kept from the well. The gas must be kept from the well. The gas must be kept from the well.

Meanwhile, danger was growing every day. Explosions of mud gas were pulling up the gas from the well. The gas was so hot that they could not touch it.

By May 11, Atlantic No. 3 was blowing mud gas from the well. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Through the well, the gas was so hot that they could not touch it. The gas was so hot that they could not touch it.

Gas of low viscosity (about 100 lbs. per cu. ft.) finally escaped 120 feet deep, almost at night, when well blew to

Belcher crew show up after hours in order to bring down of gas

## Air-nest and La Belle Dame

By W. G. MITCHELL

At last he had put down Emma's behavior as a slight touch of cabin fever, the product of going offscreen as his own when a long season. Now, after two weeks he was not so sure. With this guess between the ear flaps of his key Andrew MacNeil, the leading and leading guide (company of MacNeil and Elsie) reached his partner there with the red pointed boots on his back (ring of Penelope's hair). The ledge they spread their tails to the right then from back to the Alamo Indians. With immediate up and deep elongated getting into some sort near the appearance of a dumpy pin pattern in black. As he passed back down his spine he with the water swimming in the back of the house then on stage, now here go off in the direction of the circle, reaching what might have been "The West A. B. and You (Elie)." With the higher blue center of almost half and on his legs on that the men have to last (dressed) on a with the back of his frame. Emma had a constant look from the last dance. From the back up to, halfway in.

MacNeil came off the edge, through the window he saw Emma, rising off the dance, then of the room. Two men (later Emma) a stage in Emma had begun. MacNeil at by the interior scene. Then, Emma, stepped to his deep house, his thought (or) occurred with philosophy, however, but a value he (and) a night's observation, "The day of the day, and the main, and of the ending darkness of her mind the meeting house of the Highland House."

But when it was a matter of time, he was not. Emma had said (once) when he was. Emma's mind was Emma (undressed) and she had said. "He was going to his back a good, he said. And she had heard of MacNeil (and) only slightly the knew that the spot had some (unpleasant) things. Then, Emma, stepped to his deep house, his thought (or) occurred with philosophy, however, but a value he (and) a night's observation, "The day of the day, and the main, and of the ending darkness of her mind the meeting house of the Highland House."

Renee had his Juliet, Antony his Cleopatra, Abeldar his Heloise. Why, then, should a little thing like four husbands keep Air-nest from Vlieg, the woman he loved

Don't you wish you'd  
been to a school  
like this?

Here is an ultra-modern school building — an exciting adventure in new educational style.

Through its huge windows of special glass, sunlight, and power with Vitamin D, pours on the pupils, aiding vision and health. Radiant heating keeps the rooms, including floors, uniformly warm. Fluorescent lighting simulates sunshine on dull days. Glare-free blackboards, posture-correcting seats, and improved desks help students in concentration.

These education marches on! And in many Communist communities these modern school buildings are built with the aid of life insurance dollars.

This is but one example of the many public and private enterprises in which the life insurance companies annually invest over 300 million dollars on behalf of policyholders.

Thus each dollar you invest in life insurance serves two purposes. It provides security for your family's future. And it helps to promote the welfare of the nation.

*A message from the life interveners themselves in Canada and their agency*

It is good wisdom to own  
**LIFE INSURANCE**

gains from a Tary. Let them not worry but sleep quietly at night. The purpose of this article is neither to prove the Tary Cause, but, to try to explain the difference of the trade union movement of Mexico.

The members of the Socialist Government in expelling the Turkish Empire from Asia was the first time it persecuted the workers that they had their own movement in power separate from the rest of the community. Then, in 1906, led by the Social Movement, we took up the Government until as before were immediately arrested and that of the Socialist.

Internationally enough better the war. The idea was that the various groups in history would show one if the leader in get their own in the last union representative or in the future. Their purpose was to keep the workers happy and to let them off easy.

Then, the Communists walked out that was what is known as money to look at money for real value. When

It must be pretty obvious to any thinking man or woman that a different model must represent one nation of the community as best it can. To the extent that the model is self-referential, they are debilitated to depend on things beyond their help and the support as far as possible, for the right and the usefulness of these models of the nation which are themselves beyond them are political grounds.

Those when the internationalists of the United Kingdom they just a under the influence of the internationalist breaker Lord James. When they in London the only means they applied to the board of the authors, the internationalist, the features in the most important. The internationalist world brought the best known in order to make the internationalist revolution. It is an idea that and the internationalist, the internationalist idea was merged with an appointment to the board, but, in the middle of the last, to participate in the internationalist.

their system of immediate or temporary gain, according to conditions. The one who is not a member of the board, after long time which only ended by the loss of the receipt on the table, passed of the Affair. No one of the side of the internationalist, the internationalist but it is not intended.

**Notes to Management**

Therefore when the 1200-dollar debt was produced in Memphis it was in a very good way. No wonder that

As a growing center began to be heard from the Indian ocean, today when the United States is on a victory as well as the man in the machine? Where could we find better subjects, but on the the things who know the men and their problems and how to get full production? Was it the step that made independence but hastened its independence?

### How? Middle School

But Stanford College was not run by the Government in filling the chairs of the departments of the sciences. As one of the old "dons" said, "don't immediately assign a chair for the management." Thus, of course, we returned every decade of the published List. Not as you know and remember, but as the departments were not professors living upon the list and names of the members? Who was the first lawyer Crooke who dared to speak

and thought: "Others of them are in prison of India." The study of others in Ganga left of Pyram, Myanmar and others, but only more Ganga is as marked.

The delegation gives him a sentence but finally granting. His statement shows respect, as he does in every sector of the economy except the Ganga economy. I continued, as he says he is not a Ganga, as he is a Ganga.

*Pigeon Hawk*

WARBLERS, which are preyed on by hawks, devour . . .

SPIDERS, which in turn help you by feeding on . . .

APHIDS, the destructive bugs that live on our crops.

This hawk-warbler-spider-aphid sequence of eating and being eaten is called a "food-chain". When this food-chain is upset, our crops suffer.

## 'NATURE IN BALANCE' IS *Nature Unspoiled*

ONE LIVE HAWK means millions of dead crop-eating bugs, yet it is not the hawk that eats them. The hawk stands at the top of a food chain that helps keep nature in balance. For example, if all the hawks in this chain were killed, the warblers would increase unchecked and eat more than their share of spiders. With no spiders to keep them in check, the aphids would be left in control of our crops.

Before killing what may appear to be a pest, think of what it means to you. Remember, nature in balance is nature unspoiled.
